

We are pleased to share the assignment for the **Frontend Development Intern** role at **Floww APIs Pvt Ltd**. Please find the details below:

Frontend Intern Assignment

Objective:

The goal of this assignment is to evaluate your skills in building intuitive, responsive, and user-friendly interfaces. You are tasked with developing a web-based interface based on the given requirements.

Part 1: Task - Build a Simple Dashboard (40 Marks)

Requirements:

- Create a user dashboard page with at least three sections:
 - **Profile Information:** Display user details like name, email, and profile picture.
 - **Tasks:** Display a list of tasks with a checkbox to mark them as completed.
 - **Statistics:** Show simple statistics (e.g., number of completed tasks, pending tasks).

Tech Stack:

- HTML, CSS, and JavaScript
- Use a frontend framework like **React.js** or **Vue.js**
- Make it responsive for both mobile and desktop views

Design Requirements:

- Follow modern UI design principles
- Use a clean and intuitive layout
- Ensure the page is fully responsive

Additional Features (Optional, but a bonus):

- Use a mock API (you can create a JSON file or use tools like **JSON Placeholder**) to fetch data dynamically.
 - Implement a form for editing user details.
-

Part 2: UI/UX Design (20 Marks)

Based on the following prompt, create a simple wireframe for a **Login Page** and a **Sign-Up Page** (using tools like **Figma** or **Sketch**).

- **Login Page:**
 - Fields: Username, Password, Login button, Forgot Password link.
 - Include simple feedback messages like "Incorrect username or password".
 - **Sign-Up Page:**
 - Fields: Name, Email, Password, Confirm Password, Sign-Up button.
 - Include a checkbox for agreeing to terms and conditions.
-

Part 3: Code Review & Documentation (20 Marks)

- Provide documentation for your code:
 - What libraries and frameworks were used?
 - Explain any key functions or components in your code.
 - Provide an overview of the folder structure and any important files.
-

Submission Guidelines:

- Submit your code in a zip file or a GitHub repository.
- Attach your **resume** along with the assignment.
- Deadline: **24 hours after receiving this email**
- Send your completed assignment to: hr@gofloww.co
